ROLIN AZMITIA

M365 ADMINISTRATOR

PERSONAL PROFILE

Highly resourceful and approachable M365 Administrator with over 3 years of providing IT support to Enterprise users. Strong advocate of standardization and automation to make mine and my users' lives easier in the long-run. With a proactive mindset to tackle improvement opportunities.

CORE COMPETENCIES

Microsoft 365 Administration

SharePoint Online, Microsoft Teams, Entra ID, OneDrive, Microsoft Office 365 Suite, Microsoft Purview

Automation and Scripting

PowerShell scripting, Power Automate flows, SharePoint site templates

Other

Information governance, Active Directory, Service Now, Remote support tools

WORK EXPERIENCE

SharePoint Support Engineer

RSM US-El Salvador | May 2025 - To date

I resolve permissions and access requests for internal and external users for SharePoint sites and pages, including modifications and upgrades to the requested sites, as well as troubleshoot any error with OneDrive and its integration with a plethora of other applications, such as SharePoint Sync, Office365, Active Directory, Azure Entra ID, and limited Power Platform integration in a cross-departmental environment.

Advanced Customer Support Tech - Level 2

RSM US-El Salvador | June 2022 - May 2025

I served as the sole IT Tech for the San Salvador office, supporting over 300 people. I worked with O365, Azure, Active Directory, office network printers and networking equipment ensuring 99%+ availability. Implemented inventory management systems, and custom PowerShell scripts for user's laptop provisioning,

NOC Analyst

YellowPepper - Visa | Nov 2021 - June 2022

Worked with my team to detect and report any substantial anomalies through Grafana that might've arisen in one of the many processes undergoing YellowPepper's services.

CompTIA A+

Obtained March 2023

HDI Desktop Advanced Support Technician

Obtained October 2022

TECHNICAL PROJECTS AND ACHIEVEMENTS

Custom PowerShell - Permission groups migration

I developed a custom PowerShell script using PnP to mass migrate all of the group permission from one site (source) to another (destination). Especially useful for really big sites, saving multiple hours of manually checking permissions on the destination site. It takes into account

Personal Knowledge Base of SharePoint

Amassed a personal Knowledge Base / Wiki in Notion as part of my efforts to automate responses to the most common user issues. Also created custom GIFs and images to aid users in understanding more technical procedures and speeding up the resolution process.

PowerShell for laptop provisioning

Wrote a script to automatically complete the final tasks when preparing a new laptop to be assigned to a newly hired user. It sets favorite sites in Edge, setting the Windows keyboard language to English, executed a custom QA program, and cleaned everything up prior to delivery.
